Trifectiv® Plus Wound & Burn Care 100 mL (3.4 FL. OZ)
Instructions/package insert
Trifectiv® Plus Wound & Burn Care is ideal to treat burns, wounds, bites, scrapes, skin infections and other trauma to the skin. The active ingredient is hypochlorous acid (HOCl).
Trifectiv® Plus Wound & Burn Care helps to cleanse the wound and accomplish the goals of wound bed preparation in a safe, effective, and natural way. This solution of premium-grade hypochlorous acid (HOCl) is anti-bacterial and soothes the wound. This ensures better, faster wound healing with a lower risk of infection and a marked improvement in pain and odour in chronic non-healing wounds. The potential for scarring as the wound heals is also reduced.

Composition
Hypochlorous acid 380 mg/L and water (Aqua)

Medical device classification
Medical device Class C (ZA). Suitable for use on open wounds.
Wound irrigation solution, antimicrobial.

Indications
Any condition where the skin's integrity is compromised.

Contra indications
Do not use on the face for prolonged periods.
Expect diminished efficacy in the presence of cortisone and anti-inflammatory gel.

Warning
If the condition does not improve within 48-96 hours, consult with your health care practitioner.
Do not use the solution if it is beyond the expiry date.

Safety
The product is safe to use during pregnancy and lactation, as well as on children, babies and animals.

QUICK GUIDE
Note: wherever possible use with wet woven gauze for maximum contact with the wound. Where dressings are impractical, or for large areas of sunburn/rash/eczema, the product can be sprayed on every 30 minutes.

1. Spray the area with **Trifectiv® Plus Wound & Burn Care** and allow to air dry for a few minutes.
2. Spray 5 mL* of **Trifectiv® Plus Wound & Burn Care** onto 3-5 sheets of clean non-sterile woven gauze and place onto the wound area.
3. Cover the wet gauze with a crepe bandage or breathable dressing to secure the dressing.
4. Change dressing every day or every other day.

USAGE DIRECTIONS FOR SPECIFIC CONDITIONS
Fungal infections/fungal nail infections & athlete's foot
Spray **Trifectiv® Plus Wound & Burn Care** onto the affected areas after cleaning and drying the feet. Allow to dry naturally. Repeat twice per day. For infected nails, start by cleaning the nails with an appropriate nail cleaning solution such as nail polish remover. Spray the clean nails with **Trifectiv® Plus**. Allow to air dry naturally. Repeat twice a day.
Note: infection should clear within two weeks, however it is important to continue use of **Trifectiv® Plus Wound & Burn Care until healed nails have grown out completely.*
Cradle Cap
Gently wash the area with baby shampoo to remove any creams/sprays before the first application. Rinse well and pat dry. Spray **Trifectiv® Plus** onto the affected areas and allow to dry naturally. Repeat 4 times a day.
Note: infection should clear within two weeks, however it is important to continue use of **Trifectiv® Plus until the cradle cap has cleared up completely.*
Oral thrush
Spray **Trifectiv® Plus** directly into baby's mouth four times per day. Spray onto the nipples after each feed or at least four times per day. Remove any excess milk from the area with a tissue before spraying. Allow to dry naturally.
Nappy rash
Clean nappy area with warm water or wet wipes. Do not use soap. Gently pat dry with a clean dry towel. Once dry, spray the affected area with **Trifectiv® Plus** and allow to air dry completely. Once the skin is dry apply a barrier cream to the skin. Do not use an ointment such as petroleum jelly. Repeat above steps with every nappy change or at least once every 2 hours until the nappy rash has healed.
Sore throat
Spray **Trifectiv® Plus Wound & Burn Care** directly into the throat every 2 hours until the pain has subsided. It is completely safe if swallowed.
Inflamed or infectious skin conditions, sunburn, bites
Spray **Trifectiv® Plus Wound & Burn Care** onto the area every 30 minutes for the first day. There-after 4 times a day until recovered. Allow to dry naturally, do not rub.
Cuts, scrapes, grazes
Wounds should be cleaned prior to application of the first dressing of **Trifectiv® Plus Wound & Burn Care** being applied. Do this by washing the wound with a sponge and warm water and a little bubble bath. Ensure that no cleanser remains on the wound after rinsing with clean water (do not use saline). Pat the wound dry with a clean towel. No further cleaning of the wound will be necessary when using **Trifectiv® Plus Wound & Burn Care**. Thoroughly spray the affected area with **Trifectiv® Plus Wound & Burn Care** and proceed to dress with woven gauze as illustrated above.
Surgical wounds & stitches
Remove any surgical dressing the day following your surgery or as soon as possible there-after. Apply a single layer of non-medicated paraffin gauze over the stitches. Wet 3-5 layers of clean non-sterile woven gauze with 5 mL* of **Trifectiv® Plus Wound & Burn Care** and place this over the paraffin gauze. Hold in place with a breathable dressing. Change all dressings daily. Once the stitches are removed continue to apply the wet woven gauze dressing daily until the wound has healed.
If you don't have stitches follow the directions below for open wounds.
Open & chronic wounds, pressure sores
Spray over the affected area until moist. Spray 5 mL* of **Trifectiv® Plus Wound & Burn Care** onto 3-5 sheets of clean non-sterile woven gauze until the gauze is wet but not drenched. Apply the wet gauze directly onto the wound, ensuring that the entire wound bed is covered. For deeper wounds, ensure that the gauze is plugged into the wound so that the wet gauze has direct contact with all surfaces of the wound. Cover the wet gauze dressing with a crepe bandage or breathable dressing. Change dressings every day or if not possible, on alternative days. Clean the wound at least twice per week under running water for 2-3 minutes before applying a new dressing.
If the area is impractical to dress spray **Trifectiv® Plus Wound & Burn Care** every 30 minutes onto the wound and let it dry naturally. Patients should exercise regularly, to the extent that their condition allows.
Burns
Remove any dead skin or other debris. Spray **Trifectiv® Plus Wound & Burn Care** onto the affected area. Wet 3-5 layers of clean non-sterile woven gauze with 5 mL* of **Trifectiv® Plus Wound & Burn Care** and apply directly over the wound, making sure that the entire area is covered. Secure with a crepe bandage or breathable dressing. Change the dressing daily following the steps above.

A special note about paraffin gauze
If, after removing the surgical gauze dressing, bleeding occurs then a single layer of non-medicated paraffin gauze can be applied before applying the gauze dressing **BUT ONLY if ALL** necrotic material (dead tissue, dead biofilm, foreign bodies) has already been removed through wet-to-moist debridement. In paediatric burns a single layer of non-medicated paraffin gauze can be used before the gauze layers wet with **Trifectiv® Plus Wound & Burn Care** are applied. This will minimise discomfort during dressing changes.

Side effects and special precautions
Slight stinging may occur for the first day of use.
Do not use with waterproof or silver-impregnated dressing.
Do not mix into or use with or after disinfectants like saline, chlorhexidine, iodine, or any other branded disinfectant.
In some cases, additional sharp debridement of visible necrotic tissue may be required before the first application of **Trifectiv® Plus Wound & Burn Care** for optimal results. Please consult with a medical professional if necessary.
THE BOTTLE IS GLASS please take care not to drop it.
Keep out of reach of babies and children. Replace the cap after use to protect the nozzle and prevent breakage.

Known symptoms of overdose
None known

Identification
Clear, colourless fluid

Presentation
100 mL (3.4 FL OZ) in a white **GLASS** bottle with atomiser pump.

Storage instructions
Store at room temperature. Protect from direct sunlight.
Discard any unused product 12 months after opening.
