trifectiv® plus WOUND & BURN CARE

BURNS

ACID BURN OF THE ARM

Context: An acid burn of the upper arm. Day 1 shows a dark, dry eschar over the posterior arm.

Treatment Plan: Closed Trifectiv® Plus dressings were used and changed daily.

Results: By day 14 the burn had healed, with only mild textural and pigment change.

Tip: Trifectiv® Plus contains only premium-grade hypochlorous acid and water, with no additives or fillers. Hypochlorous acid is the same molecule our white blood cells make. It is safe for adults, children and babies, and during pregnancy and breastfeeding.
