trifectiv® plus WOUND & BURN CARE

VENOMOUS BITES

BOOMSLANG BITE
ON DOG

Context: This dog was bitten by a boomslang on the lower part of the face and jaw.

Treatment Plan: The vet gave anti-venom and then followed the Trifectiv® protocol. A few sheets of woven gauze wet with Trifectiv® were placed onto the wound, and secured with a crepe bandage. Dressing was changed daily.

Results: The wound on the dog healed completely with little to no scarring after the 20 days of treatment.

Tip: Woven gauze lifts exudate, necrotic tissue and biofilm off the wound at each dressing change. Keep the gauze wet and in contact.
