trifectiv® plus WOUND & BURN CARE

ACUTE WOUNDS

FACIAL LACERATION
AFTER A FALL

Context: A child fell and sustained a laceration of the cheek. Day 1 shows an open, crusted wound just below the eye.

Treatment Plan: The face was left open and sprayed with Trifectiv® Plus several times a day. The solution was allowed to dry. It was not rubbed in.

Results: By day 7 the wound had closed, with only faint residual redness.

Tip: On a child's face: spray and leave open. No plaster, no ointments or creams. Trifectiv® Plus can be used in children.
