trifectiv® plus WOUND & BURN CARE

SURGICAL WOUNDS

FASCIOTOMY WOUNDS
AFTER COMPARTMENT SYNDROME

Context: A man underwent fasciotomy for compartment syndrome. The wounds were left open.

Treatment Plan: Daily Trifectiv® Plus closed dressings were started on day 7.

Results: The wounds closed by secondary intention. Skin grafts were not required.

Tip: Pack every recess of a fasciotomy wound. Leave no dry pocket behind.
