trifectiv® plus WOUND & BURN CARE

SKIN INFECTIONS & IRRITATIONS

SUN DAMAGED SCALP
WITH STAPHYLOCOCCAL INFECTION

Context: Sun-damaged skin on the scalp became secondarily infected with Staphylococcus.

Treatment Plan: The scalp was left open and sprayed with Trifectiv® Plus twice a day. The solution was allowed to dry.

Results: The infection had cleared by day 3. The skin had healed by day 30.

Tip: Where a dressing will not stay on (scalp, face, ears), leave the area open and spray every thirty minutes on the first day, then four times a day. Do not rub it in.
