trifectiv® plus WOUND & BURN CARE

BURNS

SUPERFICIAL PARTIAL THICKNESS BURN **FROM OIL**

Context: Hot oil splashed onto the patient's face while she was cooking, causing a superficial partial-thickness burn.

Treatment Plan: The face was left open and sprayed with Trifectiv® Plus twice a day. The solution was allowed to dry; it was not rubbed in.

Results: The burn had cleared by day 10, with no scarring.

Tip: On the face, spray and leave open. Do not cream or dress. Pain usually eases within 24 hours if the protocol is followed.
